Position on MIAAP you wish to be considered for:

Member of the Board of Directors

Please briefly state why you would like to be considered for this position, what qualifications would be an asset to MIAAP, and what are the 2 top AAP policy priorities you would shepherd on the board if elected:

I have a strong commitment to championing the issues of children and young adults with physical and mental impairments. In recent years, as one of three beta sites within Michigan, I have implemented successfully the Medical Home standard of care within the HFHS pediatric clinical setting. While solving the challenges of implementation, I also directed the development of a comprehensive electronic care plan. My experience with the successful implementation of these initiatives offers insight as well as a proven eagerness to solve resource and institutional challenges regarding these initiatives. As a member of the board, I would shepherd solutions and processes regarding the Medical Home Initiative and the Electronic Medical Record Initiative.

What initiatives would you support to develop the capacity of the MIAAP to meet the needs of our members and support the mission of the organization?

Recently, I have developed affiliations with libraries and other resource providers to implement a literacy initiative for children beyond the scope of Reach Out and Read. ROR does an outstanding job with forming the foundation for young readers. However, young readers and pre teens require guidance and encouragement to build upon their strong foundations. An initiative in this area would serve the mission of our organization well.
