

Importance of Emotional Health and Resilience for Patients and Families with Chronic Pediatric Conditions Reference List for Self-Assessment

PLEASE NOTE: A direct link to each reference is provided where possible but, in some instances, access only to the abstract has been provided. The ABP does its best to obtain permission rights to each reference selected for the exercise. However, in some cases, this is not possible. As a result, unless you have a subscription to the journal or access to a medical center or hospital library, you may incur an extra charge to access the reference online. Also note that some self-assessment exercises and their accompanying reference lists are not created by the ABP.
